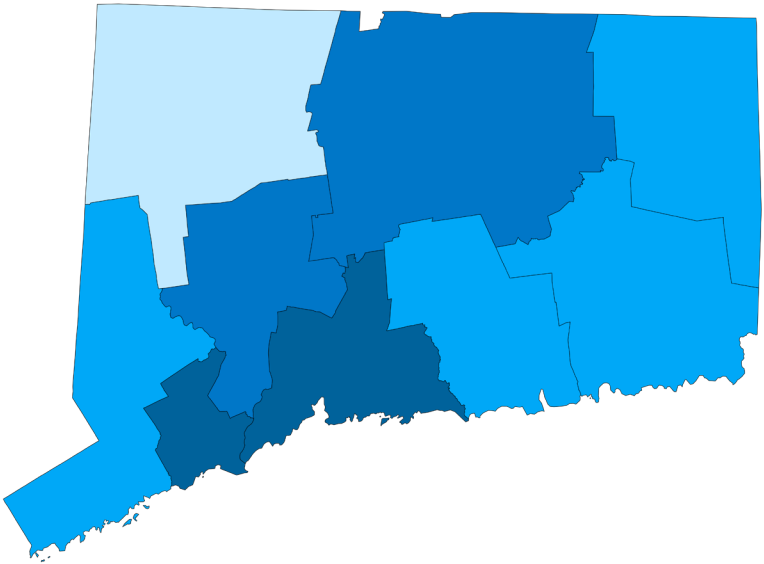
Connecticut

Risk of Social Isolation by County



Index of social isolation risk factors (living in poverty; living alone; being divorced, separated or widowed; having never married; having a disability; and having independent living difficulty) among adults age 65 and older, relative to all U.S. counties. Normalized values are 1 to 100, with a higher value indicating greater risk.

1 to 32 | 33 to 38 | 39 to 43 | 44 to 51 | 52 to 100 | No Data
