# **Economic Hardship Index**

The economic hardship index compares financial strain between states. It combines six population-level social and economic measures to provide a more complete picture of the difficulties faced by communities than a single measure could provide.

Measure	State Value		
Crowded Housing (units with more than one person/room)	2.3%		
Dependency (ages 0-17 or ages 65+)	38.4%		
Education (ages 25+ without a high school diploma)	10.2%		
Per Capita Income	\$37,728		
Poverty (households below the poverty level)	11.8%		
Unemployment (ages 16-64)	5.0%		

## **Multiple Chronic Conditions**

Chronic conditions are medical conditions that last more than a year, require ongoing medical attention and/or limit activities of daily living. Adults with multiple chronic conditions represent one of the highest-need segments of the population.
