Trends

Economic Hardship Index

The economic hardship index compares financial strain between states. It combines six population-level social and economic measures to provide a more complete picture of the difficulties faced by communities than a single measure could provide.

Measure	State Value		
Crowded Housing (units with more than one person/room)	4.9%		
Dependency (ages 0-17 or ages 65+)	37.6%		
Education (ages 25+ without a high school diploma)	12.4%		
Per Capita Income	\$41,857		
Poverty (households below the poverty level)	13.3%		
Unemployment (ages 16-64)	4.5%		

Multiple Chronic Conditions

Chronic conditions are medical conditions that last more than a year, require ongoing medical attention and/or limit activities of daily living. Adults with multiple chronic conditions represent one of the highest-need segments of the population.

Measure	State Value
Arthritis	22.2%
Asthma	9.3%
Cancer (excluding skin)	6.9%
Cardiovascular Disease	7.9%
Chronic Kidney Disease	2.5%
Chronic Obstructive Pulmonary Disease	5.8%
Depression	15.3%
Diabetes	10.5%
