Trends

Economic Hardship Index

The economic hardship index compares financial strain between states. It combines six population-level social and economic measures to provide a more complete picture of the difficulties faced by communities than a single measure could provide.

Measure	State Value	
Crowded Housing (units with more than one person/room)	1.9%	
Dependency (ages 0-17 or ages 65+)	38.3%	
Education (ages 25+ without a high school diploma)	6.9%	
Per Capita Income	\$35,702	
Poverty (households below the poverty level)	10.8%	
Unemployment (ages 16-64)	3.5%	

Multiple Chronic Conditions

Chronic conditions are medical conditions that last more than a year, require ongoing medical attention and/or limit activities of daily living. Adults with multiple chronic conditions represent one of the highest-need segments of the population.

Measure	State Value
Arthritis	27.1%
Asthma	11.6%
Cancer (excluding skin)	7.2%
Cardiovascular Disease	8.7%
Chronic Kidney Disease	2.4%
Chronic Obstructive Pulmonary Disease	6.6%
Depression	22.1%
Diabetes	8.7%
