Trends

Economic Hardship Index

The economic hardship index compares financial strain between states. It combines six population-level social and economic measures to provide a more complete picture of the difficulties faced by communities than a single measure could provide.

Measure	State Value
Crowded Housing (units with more than one person/room)	1.5%
Dependency (ages 0-17 or ages 65+)	39.2%
Education (ages 25+ without a high school diploma)	7.2%
Per Capita Income	\$34,568
Poverty (households below the poverty level)	10.2%
Unemployment (ages 16-64)	3.3%

Multiple Chronic Conditions

Chronic conditions are medical conditions that last more than a year, require ongoing medical attention and/or limit activities of daily living. Adults with multiple chronic conditions represent one of the highest-need segments of the population.

Measure	State Value
Arthritis	27.6%
Asthma	10.2%
Cancer (excluding skin)	7.7%
Cardiovascular Disease	7.3%
Chronic Kidney Disease	2.8%
Chronic Obstructive Pulmonary Disease	5.6%
Depression	20.5%
Diabetes	8.7%
