Trends

Economic Hardship Index

The economic hardship index compares financial strain between states. It combines six population-level social and economic measures to provide a more complete picture of the difficulties faced by communities than a single measure could provide.

Measure	State Value
Crowded Housing (units with more than one person/room)	2.1%
Dependency (ages 0-17 or ages 65+)	40.3%
Education (ages 25+ without a high school diploma)	5.5%
Per Capita Income	\$34,104
Poverty (households below the poverty level)	10.7%
Unemployment (ages 16-64)	3.7%

Multiple Chronic Conditions

Chronic conditions are medical conditions that last more than a year, require ongoing medical attention and/or limit activities of daily living. Adults with multiple chronic conditions represent one of the highest-need segments of the population.

Measure	State Value
Arthritis	25.0%
Asthma	9.5%
Cancer (excluding skin)	7.3%
Cardiovascular Disease	8.0%
Chronic Kidney Disease	2.3%
Chronic Obstructive Pulmonary Disease	6.8%
Depression	19.2%
Diabetes	7.8%
