## Strengths

- High immunization among adolescents for Tdap
- Low incidence of infectious disease
- Low premature death rate

## Challenges

- Large disparity in health status by education level
- High prevalence of excessive drinking
- Low per capita public health funding

- Indicated data is missing or is not directly comparable to 2015

\* Negative value denotes below US average; positive value denotes above US average.

\*\*Difference in the percentage of adults aged 25 and older with versus without a high school education who report their health is very good or excellent.

\* Not directly comparable to prior data because of change in methodology of BRFSS.

High Health Status is the percentage of adults reporting their health is very good or excellent.

For high health status, the larger the area, the healthier the subpopulation.

#### High Health Status (% of adult population)
