Children	0.009	26	MS	-0.291	MA	0.231	0.000	

Strengths

- Low prevalence of excessive drinking in women
- Low prevalence of smoking during pregnancy
- Low prevalence of missed school days

Challenges

- High prevalence of concentrated disadvantage
- Low percentage of home health visits
- Low rate of high school graduation

NA = not available

The figure shows the rate for each subpopulation as the distance a colored segment extends from the center. The dotted line shows the rate for the entire state. The greater the distance a segment is from the dotted line, the greater the inequity. If all were equal, the sunburst would be a perfect circle bordered by the dotted line.

Percentage of women aged 18 to 44 who report having a personal doctor or health care provider

Rate of Infant Mortality

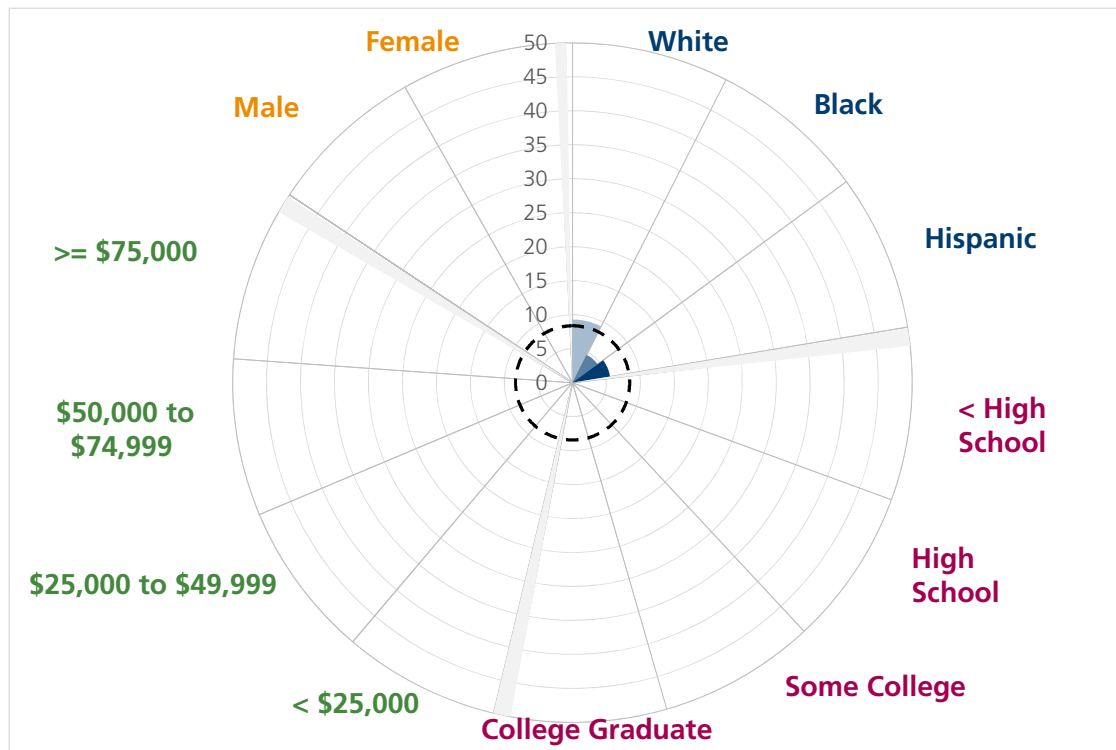

Group	Value
White Race	5.0
Black Race	9.5
Hispanic	5.4

NA = not available

Subpopulation data only available for race/ethnicity

Number of infant deaths (before age 1) per 1,000 live births

The figure shows the rate for each subpopulation as the distance a colored segment extends from the center. The dotted line shows the rate for the entire state. The greater the distance a segment is from the dotted line, the greater the inequity. If all were equal, the sunburst would be a perfect circle bordered by the dotted line.

**Rate of Teen Suicide**

Group	Value	95% CI
Whites	9.4	7.7 - 11.2
Blacks	3.1	2.0 - 4.6
Hispanic	NA	NA

NA = not available

Subpopulation data only available for race/ethnicity

Number of deaths by suicide per
100,000 adolescents aged 15 to 19
years

The figure shows the rate for each subpopulation as the distance a colored segment extends from the center. The dotted line shows the rate for the entire state. The greater the distance a segment is from the dotted line, the greater the inequity. If all were equal, the sunburst would be a perfect circle bordered by the dotted line.
