State Nation

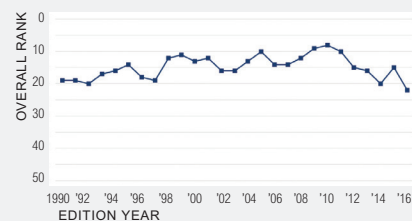

The 2012–2016 data in the above graphs are not directly comparable with prior years. See Methodology (page 150) for additional information.

Overall Rank: 22

Change: ▼ 7

Determinants Rank: 20

Outcomes Rank: 32

Strengths:

- Low levels of air pollution
- Low violent crime rate
- Higher number of primary care physicians

Challenges:

- High prevalence of smoking
- High incidence of pertussis
- High infant mortality rate

Ranking:

Maine is 22nd this year; it was 15th in 2015. The state ranks 8th for senior health and 11th for the health of women and children.

Highlights:

- In the past two years, drug deaths increased 24% from 11.0 to 13.6 deaths per 100,000 population.
- In the past year, HPV immunization among males aged 13 to 17 years increased 70% from 27.5% to 46.7%.
- In the past year, immunizations among children aged 19 to 35 months decreased 15% from 84.7% to 71.8%.
- In the past two years, low birthweight increased 15% from 6.6% to 7.6% of live births.
- In the past year, disparity in health status by education increased 10% from 26.6% to 29.2%.
